---

Full Stack Developer with a strong foundation from the Henry bootcamp, specializing in Front End and experienced in Back End using technologies such as React, Node, Express, and Sequelize. My approach is centered around teamwork, adaptability, and efficient time management, coupled with technical skills in agile methodologies, GIT, data structures, and CSS frameworks. Additionally, I possess interpersonal skills, including effective communication, emotional intelligence, and problem-solving abilities. My English proficiency is certified at the C1 Advanced level. I am excited about the opportunity to contribute to innovative projects and continue growing as a professional in the web development world.

## PROYECTOS

### Full Stack Web Developer - Henry's individual project

July 2023 - August 2023

Academic experience: Henry Bootcamp

Developed an application aimed at visualizing a comprehensive list of all countries worldwide, allowing users to access detailed information about each country and create activities related to the corresponding country.

**Design and interface development:** Created an intuitive user interface from the landing page to the country details, ensuring accessibility and usability.

**Functionality of Country Cards:** Implemented logic to display and interact with country cards, including specific details upon clicking.

**Filters and search:** Developed filters by continent, population, and alphabetical order, along with a search bar for precise and quick results.

**Activities View and Form:** Designed a view to display activities for each country and an interactive form for creating new activities and linking them to the corresponding country.

**Optimization and Pagination:** Implemented pagination for efficient data loading, ensuring a smooth and seamless user experience.

Frontend: React, Redux.

Backend: NodeJS, Express.

Database: PostgreSQL and Sequelize.

GitHub Repository: <https://github.com/Bautizitelli/Henry-Countries-PI>

### Full Stack Web Developer - Henry's group final project

ago. 2023 - sep. 2023

Educational Experience. Henry Bootcamp

Complete application for a supermarket e-commerce platform.

**Front-end Design and Styles:** Contributed to the development of user interface design and styles, ensuring an attractive and consistent visual experience across the platform.

**Discount Logic Implementation:** Created and applied comprehensive logic to calculate and display product discounts, enhancing the platform's appeal to customers.

**Administrator Dashboard Development:** Contributed to creating a section of the administrator dashboard, providing tools to efficiently manage products, orders, and users.

**Shopping and Comments Component:** Designed and developed the component displaying user purchases, allowing users to submit comments and opinions on purchased products, encouraging customer interaction and feedback.

**User Experience Optimization:** Worked on continuously improving the user experience by implementing solutions and adjustments in the front-end to ensure smooth and seamless navigation for end users.

Frontend: React, Redux, React Admin, Bootstrap

Backend: NodeJS, Express, Nodemailer

Database: PostgreSQL and Sequelize.

Frontend repository: <https://github.com/MatiasIvanM/Super-market-Repo-FrontEnd>

Backend repository: <https://github.com/alemannn/Super-market-shop>

## TECHNOLOGIES:

**Programming Languages:** JavaScript, HTML, CSS.

**Frameworks:** Bootstrap, React, Redux, Express, Node.js, Sequelize.

**Database:** PostgreSQL.

**Tools:** Git Flow, Slack.

**Agile:** Scrum.
